

STYLING APPROACH

Plain CSS + :root custom properties

The exact supplied palette is assigned to accessible component and surface roles.

Five-color palette

Deep burgundy carries text and actions; lighter colors shape the surfaces and structure.

--color-accent
#AF4963 | secondary actions

--color-surface
#D4E3EF | cards / fields

--color-muted
#8B9EB6 | borders / dividers

--color-bg
#E2E3E1 | page background

--color-primary
#810F31 | brand / text

Verified contrast

Normal text threshold: 4.5:1. Blue-grey is decorative only and never carries normal text.

Foreground	Background	Use	Ratio	Result
#810F31 burgundy	#E2E3E1 light grey	body text on page	7.97:1	PASS
#810F31 burgundy	#D4E3EF light blue	text on cards and fields	7.84:1	PASS
FFFFFF white	#810F31 burgundy	header and primary buttons	10.26:1	PASS
FFFFFF white	#AF4963 dusty rose	accent buttons and badges	5.31:1	PASS
#810F31 burgundy	FFFFFF white	document surfaces if needed	10.26:1	PASS

Three-level type scale

System sans-serif; shown at proportional print sizes.

Heading / 32px / 700

Body text / 16px / 400 - Clear vehicle and modification details.

Small / 14px / 400 - Labels, metadata, help, and footer text.

8px spacing system

Multiples of one base unit create a consistent rhythm.

ACCESSIBILITY CHECKLIST

[x] All intended text pairs pass 4.5:1

[x] Semantic header, nav, main, form, and button elements

[x] Descriptive alt text; decorative images use empty alt

[x] Every field has a visible connected label

[x] Keyboard access and visible focus on all controls

[x] Status and progress text always accompany color

[x] Touch targets are at least 44px high

[x] Loading, error, empty, and validation states use text

[x] Dialog traps focus and returns it when closed
